

**Telco
Intercontinental**

Features

- Zoom in, zoom out, rotation
- Slide text and image
- Drag out a subject to different location or into another subject
- Multi-touch allows two fingers to control panel simultaneously
- Long life expectancy and high durability
- Better optical performance, high transparency and high resolution
- High sensitivity, diverse operation, water-proof, anti-electromagnetic radian advantage.

Advantages

- Better production efficiency and Less lead time — with the FPC and Printing production under one roof, we can do better job in cost control, better efficient production and better quality control.
- Rugged design that is able to operated by wet fingers and excellence in absorbing interference (EMI) from LCD module.
- Competitive price and Lower tooling cost with efficient manufacturing process,

Applications

- PC, Mobile Phone, Hand-Held Instrument, E-Book, GPS, Information Terminal, Writing Pad, Game

Specification

Circuiting	Transparency	Contact	Resolution	Surface	Input Mode	Life	Operating	Lens material	Glass
3.3~5V DC, 35mA	>90%	<2ms	1024*1024	6H	Finger or stylus pen	Over 225 millions	-10 ⁰ C to 60 ⁰ C	Chemically strengthened glass	0.55mm, 0.7mm,1.0mm
