

Motorized Rollers Built Around our Highly Efficient Planetary Gearmotor

- Highlighting an Impressive Range of Voltages, Sizes, Speeds, Material
- Up to 40% more efficient than traditional gearmotors
- Crowned or flat versions available
- Carbon steel housing with aluminum endcaps
- Stainless steel versions available
- High precision gears for low noise and long life
- Concentric and Planetary gearing
- Additional OEM customization services available.

Motorized Roller Design Features

- All Precision Steel Gearing
- Diameters: 42mm to 165mm (1.65 to 6.6in)
- Lengths: 245mm to 1000mm (9.6 to 39 in)
- Power: 0.01kW to 2.2kw (1/75 ~ 3HP)
- 1 or 3 Phase AC Voltages
- Brushed or Brushless DC Voltages
- Class F Insulation
- Environmental Protections: IP66/67
- Pre-filled Lubrication
- Long, Maintenance Free Operation
